

# LOCKBOURNE, OHIO

## 2011-2021 Tree Canopy Summary

### Community & County Overview

The Village of Lockbourne has an estimated population of 235 residents and encompasses an area of 540 acres. In Lockbourne, 19.0% of land is covered by tree canopy compared to 23.9% of land in Franklin County<sup>1</sup>.

Trees provide essential ecosystem services. Franklin County's trees save \$10 million by absorbing stormwater, \$8 million by storing carbon, and \$15 million of avoided healthcare costs from air pollution<sup>2</sup>.

**Lockbourne**  
**15,600**  
 Estimated total trees

**+5 Acres**  
 Area change in tree canopy from new plantings & incremental growth  
 (12.4 acres of gain - 7.4 acres of loss).

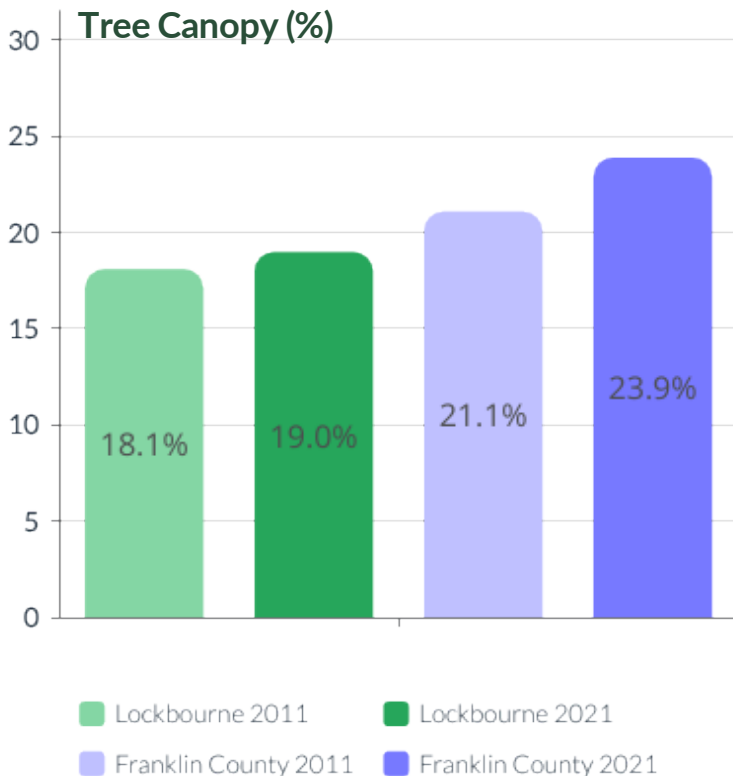

**+0.9%**  
 Change in tree canopy area

**Franklin County**  
**12.8 Million**  
 Estimated total trees

**+9,712 Acres**  
 Area change in tree canopy from new plantings & incremental growth  
 (19,202 acres of gain - 9,490 acres of loss).

**+2.8%**  
 Change in tree canopy area

### 2011-2021 Tree Canopy Change Map

### Key Terms

Tree canopy is defined as the layer of leaves, branches, and stems that provide tree coverage of the ground when viewed from above.

 **Existing Tree Canopy** - The amount of tree canopy present when viewed from above using aerial or satellite imagery.

 **Possible Tree Canopy - Vegetated:** Grass or shrub area that is theoretically available for the establishment of tree canopy.

 **Change in Tree Canopy** - the percentage point change between the two time periods.

# LOCKBOURNE, OHIO

## 2011-2021 Tree Canopy Summary

### Canopy Change by Land Use

The Village of Lockbourne gained the most canopy on Agricultural land use and had a net loss in canopy on Parks and Open Space and Open Space land use.

- Agriculture
- Industrial
- Mixed Use
- Municipal
- Parks and Open Space
- ROW
- Rural Residential
- Suburban Residential
- Urban Residential
- Vacant and Other

### Possible Tree Canopy

In Lockbourne, 77% of land could be planted with additional trees, compared to 48% in Franklin County. Tree canopy is one of seven classifications from the high-resolution land cover map (right) that forms the foundation of this project. In this assessment, any areas with no trees, buildings, roads, or bodies of water are considered Possible Tree Canopy and represent locations in which trees could theoretically be established without having to remove paved surfaces.

### Environmental Equity

- **Tree Canopy:** The extent of canopy cover in Lockbourne is 19.0% of its total land area while it is 23.9% for Franklin County.
- **Temperature:** The average high in °F for Lockbourne is 87 (max. 88), and 93 (max. 107) for Franklin County in 2021. Combining this information with tree canopy values allows us to understand the role trees could play in reducing heat islands.
- **Asthma Rate:** Average asthma rates per 1,000 residents in Lockbourne are 10.30 while this value is 9.93 for Franklin County. Combining this information with tree canopy values allows us to understand the role trees could play in removing pollutants from the air.
- **Income:** Lockbourne has a median household income of \$49,441, while Franklin County's is \$59,097. Combining this information with tree canopy values allows us to understand the role trees could play in promoting equity for socio-economically vulnerable groups.

### Recommendations

Preserving existing tree canopy is the most effective means for securing future tree canopy, as loss is an event but gain is a process.

Plant new trees in areas where tree canopy is low or in locations where there has been tree canopy removed to help grow canopy.

Refer to the full Tree Canopy Assessment and corresponding geographic data available by Franklin County and its jurisdictions to help manage trees.
